An apple is an edible fruit produced by an apple tree (Malus domestica). Apple trees are
cultivated worldwide and are the most widely grown species in the genus Malus.

<span class="floatright"></span>

The tree originated in <a href="xxx.html">Central Asia</a>, where its wild ancestor, Malus
sieversii, is still found today. Apples have been grown for thousands of years in Asia and Europe
and were brought to North America by European colonists. Apples have religious and

```

mythological significance in many cultures, including Norse, Greek and European Christian tradition.</p>

<p><p> BBlueberries are perennial flowering plants with blue or purple berries. They are classified in the section Cyanococcus within the genus Vaccinium.

<div class="floatleft"></div>

Vaccinium also includes cranberries, bilberries, huckleberries and Madeira blueberries.[1] Commercial blueberries—both wild (lowbush) and cultivated (highbush)—are all native to North America. The highbush varieties were introduced into Europe during the 1930s. </p>
